

Dear INDESGUA staff

Unilasalle Beauvais, France and UPV in Valencia, Spain is part of the Erasmus Mundus Master Program in Plant Breeding – emPLANT+, together with 5 other European Universities.

This Master's Degree is a **program of excellence** that aims at providing students interested in Plant Breeding with training in science, management, law, languages and soft skills that are needed in this field by the Seed Industry and Research Institutes.

*More information about the program are available [here](#).*

**Full scholarships** (tuition fees, travel costs and living allowance) are available for the **best students worldwide**. All countries over the world are eligible to the Erasmus Mundus scholarship.

In addition to those worldwide scholarships, we also grant full scholarships for **specific countries** in the world and **GUATEMALA** is part of it.

Which means a student from **GUATEMALA** has more chances to get a grant as s/he could obtain a scholarship in the “worldwide category” or in the “specific country” category.

*More information about the granted scholarships are available [here](#).*

We would be very pleased if you could **share this information** with your students/network/colleagues as we look forward to receiving applications from Guatemalan applicants.

The **call for applications** for emPLANT+ with a full scholarship is open from **October 1<sup>st</sup>, 2022 to January 12<sup>th</sup>, 2023**.

*Admission requirements are available [here](#).*

Best regards,
