※ Apostille and Consular Legalization

1. What is an Apostille?

An Apostille is a certificate that authenticates the origin of a public document for use in another country. It is issued under the Hague Convention of 5 October 1961 Abolishing the Requirement of Legalization for Foreign Public Documents, commonly known as the Apostille Convention. With an Apostille certificate, public documents such as diplomas, transcripts, birth certificates, and notarial documents can be recognized as valid in other member countries without additional legalization.

For more information, please refer to: <https://www.hcch.net>

2. In Which Countries Does the Apostille Convention Apply?

The Apostille Convention applies only to countries that are members of the Convention. Applicants should check whether their country is a member of the Apostille Convention at the following website: <https://www.hcch.net>

3. What If the Apostille Convention Does Not Apply in My Country?

If a public document was issued in a country that is not a party to the Apostille Convention, the applicant's academic documents must undergo consular legalization. This process requires:

- 1) Authentication by the Ministry of Foreign Affairs of the issuing country, and
- 2) Legalization by the Embassy or Consulate of the Republic of Korea in that country.

4. Where Can an Apostille Be Issued?

Each country that is a party to the Apostille Convention designates one or more authorities authorized to issue Apostilles. These authorities are called Competent Authorities. Only these designated authorities are permitted to issue Apostille certificates.

For the list of competent authorities by country, please refer to: <https://www.hcch.net>

5. How Much Does an Apostille Cost?

Fees for issuing an Apostille certificate vary depending on the country and the competent authority. Applicants should check the applicable fees with the relevant authority in their country.

6. Do Documents from Private Schools Require Notarization?

Yes. Documents issued by private schools or institutions must first receive notarial certification before an Apostille certificate can be issued. All documents must be written in English or Korean. If a document is written in another language, it must be translated into English or Korean and notarized before applying for an Apostille certificate.
